DUROLLA TOILET ROLL DISPENSER MODEL 120

Functional design and washroom enhancement

Easy to Use

When the roll in use is finished the next roll is accessed by simply triggering the PATENTED refill lever.

Reduces Servicing Costs

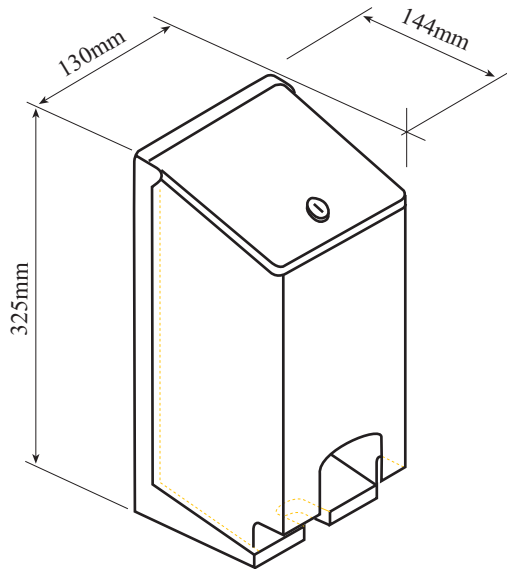

The one roll reserve (kept clean and secure) reduces time spent on ensuring that adequate supplies of tissue are available. The translucent front quickly determines the need for servicing.

Reduces Vandalism and Pilferage

The construction is of high quality resins, giving a strong durable product with a wipe clean finish. The chrome lid prevents cigarette burns. The lockable cabinet eliminates pilferage and unsightly rolls lying around the washroom.

Is Widely Accepted

The dispenser has been proven in all washroom conditions from heavy industrial and commercial to government and domestic use.
